Simplify your payroll and eliminate attendance fraud using the latest face recognition technology.

The **smarter** way to clock in

**from
£285.00
ex VAT**

What's in the box?

- ✓ Face recognition clocking in terminal
- ✓ TimeVision Software
- ✓ UK Power Adaptor
- ✓ Network Cable
- ✓ Back Plate and Fixtures
- ✓ Instruction Manual
- ✓ 1 Year Hardware Warranty
- ✓ 1 Year Free Support

Employees clock in and out simply by presenting their face to the terminal.

TimeVision identifies each employee by scanning their unique facial profile in less than 1 second, eradicating attendance fraud by eliminating the possibility of employees clocking in and out for each other.

When employees clock in and out the clocking data is sent across the network

to your PC or can be collected on a USB memory stick. The TimeVision software then automatically calculates each employee's basic hours and overtime with accuracy and according to your working patterns. The user-friendly software allows you to view everything on screen and edit data as required, before printing reports or exporting data into Sage payroll.

Ready to fit straight from the box clocking in solution

Based on an award winning concept, TimeVision was developed to give you exactly what you expect from a clocking in system without all the fuss and complication. It merges the latest high tech advances with great flexibility, yet it is simplicity itself.

The easily installed TimeVision clocking terminal and instantly useable software interface ensure that the

system can be painlessly introduced to your office environment.

And with 12 months free support included in the package you have the reassurance of knowing that we are at your disposal if you ever needed help or advice.

TimeVision is available in 2 packages defined only by the number of employees.
