Time Vision

The complete Time Recording Package for the smaller office.

Ready to fit straight from the box Time Recording solution designed for the needs of the smaller user.

The smart product for the smarter office

Introduction

TimeVision is an uncompromising yet cost effective solution to time management. The easily installed clocking terminal and instantly useable software interface ensure that the system can be painlessly introduced to your office environment.

Based on an award winning concept, TimeVision was developed to give you exactly what you expect from a time & attendance system without all the fuss and complication. It merges the latest high tech advances with great flexibility, yet it is simplicity itself.

TimeVision caters for companies with up to 50 employees and is available in 2 versions.

- 25 employees
- 50 employees

Depending on your preferred method of employee identification, a choice of clocking terminals can be selected within the pack.

- Proximity card
- Finger print
- Ingersoll Rand Handscan
