# The **faster** way to clock in

from  
**£225.00**  
ex VAT

## What's in the box?

- ✓ RFID proximity clocking in terminal
- ✓ TimeVision Software
- ✓ Proximity Cards/Fobs
- ✓ UK Power Adaptor
- ✓ Network Cable
- ✓ Back Plate and Fixtures
- ✓ Instruction Manual
- ✓ 1 year Hardware Warranty
- ✓ 1 Year Free Support

**Employees clock in and out simply by waving their card or fob in front of the clocking terminal.**

TimeVision speeds up the clocking in and out process, no queuing or waiting in line. Being non-contact, TimeVision clocking in terminal has proven to be much more reliable and easier to use than traditional clocking in machines.

When employees clock in and out the clocking data

is sent across the network to your PC or can be collected on a USB memory stick. The TimeVision software then automatically calculates each employee's basic hours and overtime with accuracy and according to your working patterns. The user-friendly software allows you to view everything on screen and edit data as required, before printing reports or exporting data into Sage payroll.

**FREE**  
12 months support

**FREE**  
1 year hardware warranty

# Ready to fit straight from the box clocking in solution

Based on an award winning concept, TimeVision was developed to give you exactly what you expect from a clocking in system without all the fuss and complication. It merges the latest high tech advances with great flexibility, yet it is simplicity itself.

The easily installed contactless clocking terminal and instantly useable software interface ensure that that the

system can be painlessly introduced to your office environment.

**And with 12 months free support included in the package you have the reassurance of knowing that we are at your disposal if you ever needed help or advice.**

TimeVision clocking in system is available in 2 packages defined only by the number of employees.
